

ISOLAB Occupational health, safety and environmental policy

Isolab is committed to health and safety practices as well as to acting in an environmentally responsible manner.

To achieve this we:

- Comply with all relevant occupational health, safety and environmental legislations regulations.
- Set-up, operate and maintain an ISO 14001:2004 environmental management system and an OHSAS 18001:2007 occupational health and safety management system that ensures continuous improvement.
- Assure that all our employees are trained and accountable for preventing work related injuries and illnesses and to prevent environmental damage.
- Aspire to prevent environmental damage and reduce the use of energy, water, gasses, chemicals and other resources and materials.
- Take the environmental and occupational health and safety performance of suppliers into account when purchasing equipment and consumables.
- Reduce the use of materials that are hazardous to man and environment as much as possible and replace them by less hazardous materials where possible.

On behalf of the direction,

Bart van der Haven
